## ■ Turcon® VL Seal® \*

### ■ Description

Turcon® VL Seal® is a unidirectional Rod seal for the same groove dimensions as standard O-Rings - Figure 67.

The design is optimized with regard to performance, friction, leakage and service life through meticulous simulation, in-house testing and qualification in the most demanding Aerospace applications.

VL Seal® effectively provides static sealing by the O-Ring. The O-Ring is protected from damage under pressure cycles by the contoured O-Ring contact zone which supports the O-Ring and keeps it in position also at high working pressure.

VL Seal® is designed with hydrodynamic back-pumping effect which allows the seal to relieve pressure trapped between tandem seals or between seals and double-acting scrapers.

\* Patent pending. (US Patent No. 6,497,415)

## METHOD OF OPERATION

The sealing mechanism of VL Seal® is based on the hydrodynamic properties of the seal. The specially formed seal edge has a steep contact pressure gradient on the high pressure side and a shallow contact pressure gradient on the low pressure side. This ensures that the fluid film adhering to the piston rod is returned to the high pressure chamber on the return stroke of the rod, minimizing the risk of leaks.

This also prevents the build-up of inter-seal pressure normally associated with tandem seal configurations - Figure 69. Inter-seal pressure depends on the system pressure, speed, stroke length and groove design.

## ADVANTAGES

- Groove design with shallow radial depth
- Optimized leakage control and service life
- Low friction with small contact area between seal and counter surface
- Featuring the Turcon® Stepseal® 2K back pumping effect
- Utilize standard O-Ring installation groove
- Available in all diameter sizes from 6 to 2,600 mm

## APPLICATION EXAMPLES

VL Seal® is recommended for hydraulics and general machine construction as an alternative to Stepseal® 2K and other single-acting seals for example in:

- Aerospace hydraulics
- Machine tools
- Automation
- Handling devices
- Telescopic cylinders
- Automobile industry
- Servo hydraulics
- Valves
- Valve stems
- Down-hole tools
- O-Ring replacement

## OPERATING CONDITIONS

<b>Pressure:</b>	Up to 60 MPa
<b>Speed:</b>	Up to 15 m/s with linear movements, frequency up to 5 Hz
<b>Temperature:</b>	-45 °C to +200 °C depending on O-Ring material
<b>Media:</b>	Mineral oil-based hydraulic fluids, flame retardant hydraulic fluids, environmentally friendly hydraulic fluids (bio-oils), phosphate ester, water and others, depending on the seal and O-Ring material compatibility see Table 47
<b>Clearance:</b>	The maximum permissible radial clearance $S_{max}$ is shown in Table 48, as a function of the operating pressure and functional diameter.

## IMPORTANT NOTE

The above data are maximum values and cannot be used at the same time, e.g. the maximum operating speed depends on material type, pressure, temperature and gap value. Temperature range also dependent on media.

## RADIAL NOTCH

VL Seal® can be delivered with radial notches at the low pressure side. This is an advantage if the seal is used in rotary applications. Notches can prevent the seal from rotating in the groove by avoiding pressurised fluid being trapped between seal and groove corner.

## REDUNDANT SEALING SYSTEM

In many applications, secondary seal systems are required. Figure 67 shows such a tandem configuration with VL Seal® .

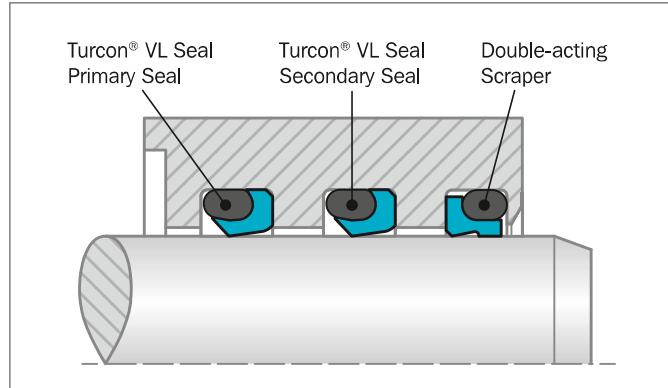

Figure 69: Turcon® VL Seal® in tandem configuration

## INSTALLATION INSTRUCTIONS

VL Seal® is dimensionally interchangeable with seals for O-Ring housings, like Turcon® Double Delta® and Turcon® Variseal® M2. Groove dimensions, radial clearances and recommended seal series in relation to diameter are as illustrated in Table 48.

VL Seal® is preferably installed in closed grooves according to Figure 11 page 39. Depending on type and size installation in split grooves is also possible. Recommended minimum diameters for installation in closed grooves see Table 7 page 39.

## RECOMMENDED MATERIALS

The following material combinations have proven effective for hydraulic applications:

### **Turcon® VL Seal ® in Turcon® M12**

All round material for light to heavy hydraulic applications with linear, short stroke or helical movements in mineral oils, flame retardant hydraulic fluids, phosphate ester, bio-oils or fluids having lubricating properties:

O-Ring:      NBR 70 Shore A      N  
                  FKM 70 Shore A      V

Set code:      M12N or M12V

### **Turcon® VL Seal® in Turcon® T46**

For medium to heavy applications with linear movements in mineral oils and other media with good lubrication.

O-Ring:      NBR 70 Shore A      N  
                  FKM 70 Shore A      V

Set code:      T46N or T46V

Zurcon® Z54 is recommended for VL Seal® as an alternative to polyurethane U-Cups especially outside the size range of these products.

For specific applications, all Turcon® materials are available.

Other material combinations are listed in Table 47.

\* At pressures > 40 MPa use diameter tolerance H8/f8 (bore/rod) in the area behind seal or consult your local Customer Solution Center for alternative material or profiles.

Slydring® / Wear Rings are not applicable at very small radial clearances please consult the Slydring® section in this catalog.  
For minimum diameter installation in closed grooves see Table 7 page 39.

### ORDERING EXAMPLE

Turcon® VL Seal® complete with O-Ring, standard application:

**Series:** REL40 from Table 48

**Rod diameter:** d<sub>N</sub> = 250.0 mm

**TSS Part No.:** REL402500 from Table 49

Select the material from Table 47. The corresponding code numbers are appended to the TSS Part No. Together these form the TSS Article Number. The TSS Article Number for all intermediate sizes can be determined by following the example.

**TSS Article No.** **REL4 0 2500 - M12 N**

Series No. \_\_\_\_\_

Type (Standard)\*\*\* \_\_\_\_\_

Rod Diameter x 10\*\* \_\_\_\_\_

Quality Index (Standard) \_\_\_\_\_

Material Code (Seal Ring) \_\_\_\_\_

Material Code (O-Ring) \_\_\_\_\_

\*\* For diameters d<sub>N</sub> ≥ 1,000.0 mm multiply only by factor 1.  
Example: REL6X for diameter d<sub>N</sub> = 1,200.0 mm  
TSS Article No.: **REL6X1200 - M12N**

\*\*\* Use suffix "N" for seals with radial notches, for diameter d<sub>N</sub> < 1,000 mm.  
(Radial notches for diameter d<sub>N</sub> ≥ 1,000 mm a special part number is required).
